GENERAL GARDENING

October 2015

Dear Customers and Friends,

This past June we issued the first in a series of catalogues that reflects changing market conditions in the bookselling business. As we discussed in the preface to that catalogue, we have made drastic reductions in the prices of many of our titles because of the confluence of several market trends: increasingly, people are using the internet rather than consulting books to answer their gardening questions; in addition, the availability of online digitized books means that information can be obtained without the need for actually owning a copy of a particular title; and, finally, the perception given by search results of numerous bookselling websites that there are scads of copies of any book you want at any time you want it have all contributed to a general depression in the prices for many titles. As a result, we have reduced our prices across the board and are now issuing this second in our series of “*bargain priced*” book catalogues.

We hope that you will enjoy reading through the catalogue and picking out some nice items for yourself or perhaps for holiday gift-giving. Featured in this catalogue are several multi-volume series of general gardening books published in the early 20th century which are uncommonly found in complete sets: The 14-volume *Garden Library* series, the 17-volume *Present-Day Gardening* series, and the 9-volume *Home Garden Handbook* series. In addition, there are some ephemeral items and original letters scattered throughout the catalogue that we hope will pique your interest. Most of the titles included in this catalogue are available only in single copies and so to avoid disappointment we suggest you order as early as possible.

Best regards,
Bradford Lyon & Joanne Fuccello

LODDIGES' BOTANICAL CABINET
WITH 699 COLORED PLATES

130. **Loddiges & Sons, Conrad** - **BOTANICAL CABINET** *Consisting of Coloured Delineations of Plants from All Countries, with a Short Account of Each. Directions for Management &c. &c.* Octavo edition. 7 volumes: Vol. 7 1822 - Vol. 13 1827. Contains engraved title in each volume plus a total of 699 (of 701) colored plates, 50 of which are fold-out. Two plates from Vol.7 are lacking. The plates were engraved by George Cooke from drawings by various artists including G. Loddiges, W. Loddiges & G. Cooke. The volumes are un-paginated and consist of 100 plates with opposing page of descriptive text giving the botanical name of the plant illustrated, the type of plant,

the date the plant was introduced into England, the country of origin (the work includes a number of North American plants), and cultivation requirements; a (2)pp. index of plants is bound at the rear of each volume. In addition, Vol.9 contains a (4)pp. index to the first 10 volumes. Bound in polished calf with gilt-tooled panel on front and rear covers, later 19th century re-backing in red calf with gilt spine lettering. Marbled edges. The volumes measure 6.25" tall by 4" wide. Stafleu #4914. London 1822-1827. Published by John & Arthur Arch; Rockwell & Martin; Longman, Hurst, Rees, Orme & Brown; and C. Loddiges & Sons.

The volumes are in generally very good condition with some scuffing; each contains the armorial bookplate of W. R. Grace (likely William Russell Grace, a former New York City mayor and founder of the W. R. Grace shipping business) as well as the name of Grace M. Ellinwood dated Apr. 7, 1894. Front joint of Vol. 6 worn with tender hinge, several joints rubbed. Plates are in very good condition, clear and crisp, though some are cropped close.

Conrad Loddiges (1728-1836) was a Dutch-born British gardener who came to Hackney, England in the 1760's and established a nursery where he, along with his son George, specialized in importing exotic plants including a number from America. The Botanical Cabinet was originally issued in monthly parts containing 10 plates each and was later bound in volumes of 100 plates each. The complete set reached 20 volumes and was published from 1817-1833. George Loddiges was responsible for most of the editorial work. The Cabinet appeared simultaneously in both a large paper edition in which the plates were fully colored and a small paper edition, which contained partially colored plates designed to highlight one or more of the plant's botanical parts (e.g., stem, leaf, flower, etc.). Interestingly, in this particular set, a total of 95 of the plates are fully colored while the rest are partially colored. Runs of these color plate botanical works are vanishing as people continue to break them up for their plates.

The set - \$2,500.00
